

CHILD BEHAVIOR TECHNIQUES USED AT CENTURY NURSERY

The staff of Century Nursery School shall manage child behavior using techniques based on developmentally appropriate practice, including positive guidance, redirection and setting clear limits that encourage children to develop self-control, self-discipline and positive self-esteem.

Therefore we will be following the **Deca Program Levels of Intervention**. This program addresses the universal, targeted and expanded approach.

The universal approach is each child is behaviorally equal and will be treated as such.

The targeted approach is when a behavior is identified as atypical and requires a more defined plan of action in dealing with said behavior. The director will meet with the parents to discuss and implement the course of action.

The expanded approach is when a behavior or developmental issue requires further evaluation. The parents will meet with the director to discuss the behavior. Once agreed upon, a request for early intervention is sent to the behavioral consultant from the Bristol Board of Education. The consultant will observe the child and develop a plan for further intervention. If the child is not a Bristol resident, the parent can contact the behavioral consultant in their town and they can come to the school, observe the child and develop a plan with Century Nursery School.
